

An underwater scene with a light blue background. In the upper left, a silver fish swims towards the right, with a trail of blue bubbles behind it. In the upper right, another silver fish swims towards the left, also with a trail of blue bubbles. In the lower half, a larger, darker fish with a red tail swims towards the left, surrounded by a large number of small, brown, spherical fish pellets. Several shrimp are scattered around the pellets. In the center, a vertical trail of blue bubbles rises from the bottom. The overall scene is bright and clear.

# ALGEL™ LIQUID

## A binding gel with superior value

Increased usage of powder form of medicines and feed supplements sometimes needs farm level binder for easy binding with feed before offering.

ALGEL™ is stable, easy to handle and mixable with feed. It additionally offers nutritive value to top up nutrients in feed.

**Composition:** Natural nutritive binding agents

**Nutritive value:** Each 100 ml contains:

Protein 100 mg, Cholesterol 25 mg, Calcium 10 mg, Vitamin D<sub>3</sub> 20 mcg, Carotenoid 50 mcg

**Target species:** Shrimp & Fishes.

### Indication:

At farm level to add on feed supplement and medicines with feed as a top coating method. Secondly it aids in increasing the pellet durability in water after offering.

### Key benefits:

- Binds all powder form medicinal, nutrient and probiotic supplements to the feed.
- Water stable and increases the bioavailability of the feed supplements.
- Enriched with carotenoid content-improves pigmentation in shrimps.
- Easily digestible.
- Easy to store and safe to use.

### Usage recommendation:

Shrimp/Prawn- 300 to 500 ml per 25 kg feed. Mix through hand mixing as top coating method. Allow for drying at least 15 to 20 minutes before application in pond

**Presentation:** 1 litre

**Manufactured & Marketed by:**
